

Civil Engineering Entry Level Design Engineer

Job Description:

Solli Engineering is seeking a Design Engineer with zero to three years' experience in Civil Engineering to join our growing team in our Monroe, CT or Boston, MA offices. A successful candidate will have the opportunity to be responsible for planning, design, permitting, preparation of specifications, septic design, stormwater calculations, and technical reports for a variety of land development projects. Engineers will be able to see projects from initial concept through completion. Housing and relocation assistance are not provided.

Requirements:

- Bachelor's degree in Civil Engineering;
- Excellent communication skills, written and verbal;
- Must demonstrate a desire to learn;
- Strong attention to detail with excellent analytical and judgment capabilities;
- Ability to effectively work independently and in a team environment;
- Working knowledge of AutoCAD Civil 3D, and Microsoft Office Suite applications;
- Reliable transportation to access job sites and a valid driver's license in good standing;
- Ability to work overtime and the occasional weekend;
- Engineer in Training Certification preferred.

Solli Engineering is a land development consulting firm providing Site/Civil, Traffic and Transportation Engineering, and Surveying services to private clients. Cross-training between disciplines is encouraged. Projects range from residential, retail, commercial, and industrial. Solli Engineering has tremendous growth opportunities and is looking for a valuable team member to help us continue to excel in the industry.

Solli Engineering is an Equal Opportunity Employer.
